

I respectfully and emphatically urge you to reject NAB's petition 04-160. Radio today is a moral wasteland. I am very willing to pay each month to keep my young children from having to be subjected to the trash talking commercials on broadcast radio, and I can't believe I should have to pay for XM each month to get quality radio and still expose them to the sheer garabage and sexual inuendo of broadcast radio to get traffic and weather information for my own safety in the car. Please ignore this desparate power grab by the NAB!!!
